Table 1
Baseline IV: First stage relevance

	NLSY79			NLSY97		
Endogenous regressor	F	Partial R^2	Shea R^2	F	Partial R^2	Shea R^2
E	81.60	0.223	0.263	138.85	0.332	0.395
E^2	29.87	0.165	0.094	61.84	0.356	0.322
E^3	17.90	0.097	0.056	39.18	0.366	0.326
SE	81.05	0.253	0.389	146.36	0.368	0.554
ZE	39.72	0.393	0.360	47.24	0.519	0.517
Observations		30,246			11,438	
Respondents		7,631			2,889	

Notes. E denotes actual experience, S schooling, and Z ASVAB. Each row summarizes one first stage, including all five excluded instruments (P, P^2, P^3, SP, ZP) and all exogenous controls. P is years since first observed employment.
The F statistics test joint significance of the five excluded instruments, with standard errors clustered by respondent. These are equation tests, not conditional F tests. Shea's partial R^2 accounts for relationships among the endogenous regressors. Sampling weights are applied.

Table 2
Baseline IV: Second stage wage equation

	NLSY79	NLSY97
Schooling	7.5906	4.1459
	(0.4549)	(1.1067)
Schooling × experience	−0.0588	0.0935
	(0.2502)	(0.2858)
Schooling × tenure	−0.1352	0.2384
	(0.2783)	(0.2663)
ASVAB	−1.7305	−0.2306
	(0.3443)	(0.7928)
ASVAB × experience	0.5858	0.3683
	(0.2352)	(0.2840)
ASVAB × tenure	0.0226	−0.1312
	(0.2551)	(0.2968)
Experience	3.5307	1.6613
	(3.8034)	(4.1191)
Experience^2	−0.1728	0.0371
	(0.1790)	(0.1999)
Experience^3	0.0048	−0.0018
	(0.0048)	(0.0059)
Tenure	13.9425	2.4244
	(3.9642)	(3.7679)
Tenure^2	−0.8908	−0.3831
	(0.1566)	(0.1715)
Tenure^3	0.0203	0.0083
	(0.0046)	(0.0057)
Observations	30,246	11,438
Respondents	7,631	2,889

Notes. The dependent variable is 100 times log real hourly wage. Entries are 2SLS coefficients, with standard errors clustered by respondent in parentheses. Sampling weights are applied. Both models include job spell, year, sex, and race controls; occupation terms are excluded.

The endogenous terms are (E, E^2, E^3, SE, ZE), instrumented by (P, P^2, P^3, SP, ZP). Other regressors are treated as exogenous. Schooling and ASVAB level coefficients apply at zero experience and tenure.

The sample retains job numbers 1 through 3 and NLSY79 observations through 2004. Wages are winsorized at the pooled 1st and 99th percentiles before sample restrictions.
